

#### **RSL and Services Clubs Association**

**Diversification** 

October 2019
Greg Russell
and Harry Harris

# Diversifying your business operations - the analysis

For many years, clubs have been encouraged to invest in new business operations to diversify their incomes and reduce dependence on gaming. Many clubs now have gyms, childcare centres, seniors living villages, aged care facilities, entertainment centres, children's play facilities, function rooms and services, bowling alleys and retail shopping centres.

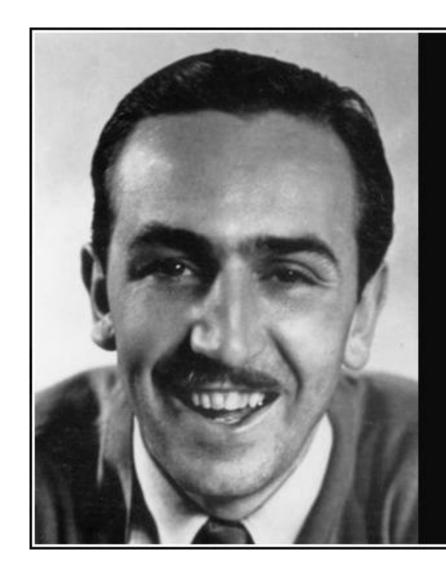

The RSL and Services Clubs Association commissioned Russell Corporate Advisory to conduct an analysis of some of the diversified club businesses to see if they are actually adding to the bottom line and securing profitability for the clubs involved.

The results of this analysis will be discussed in this session.

Like everything.....

There are 2 sides to this

Dream, diversify-and never miss an angle.

— Walt Disney —

AZ QUOTES

Wide diversification is only required when investors do not understand what they are doing.

— Warren Buffett —

AZ QUOTES

# Not all diversification is created equal

The most relevant subset for Clubs.....

# Adjacency diversification

- **Diversification** is a strategy for an organisation in positions of strength.... **Adjacency** is a strategy that works well for organisations that can take what they are best at into markets where that facet is lacking
- Toyota and Nissan example
  - Moved into luxury care competition with European brands
  - Succeeded because of lower cost and superior service network
  - They saw beyond the immediate perception of what defined 'luxury'

### Widening

- Improve and expand the existing offering
- This would include additional or expanded eateries, additional bars
- Recent examples include;
  - Wenty Leagues
  - Bankstown RSL
  - Orange Ex Services

Acquiring or developing adjacent offerings in the field of hospitality that will share a customer base or is developed on-site to foster that market segment

# Broadening

This would include additional services like Motels, over 55's developments, on-site fitness centres, childcare facilities

Recent examples include;

Wenty Leagues
Club Shellharbour
Mounties Harbord
Penrith RSL

# Diversifying

Truly entering a new business in a separate industry and completely separate from the existing customer base

Diversification is a strategy to enter into a new market or industry in which the business doesn't currently operate, while also developing a new product for that new market.

# **Underlying Strategy**

- Choice considerations:
  - Synergy potential (broadening and widening)
    - Enhance existing revenue streams
    - Ideally complement the Club's brand and culture (eg. Health, Sport)
    - attract people to the Club precinct (eg. shared car park facilities)
    - Reduce reliance on gaming revenue
  - Conformity with Club's Strategic Plan
  - Resources available?
    - Land / floor space available
    - Cash
    - Internal Skills and experience

### Examples

- Seniors Living
- Child care
- Aged care
- Carwash
- Crematorium
- Cemetery
- Marina
- Cinema
- Entertainment centre
- Accommodation hotel
- Serviced apartments
- Retail

- Butchery
- Car wash
- Petrol station
- Commercial Car park
- Café and coffee shop
- Ski park
- Bowling alley
- Medical centre
- Many of the above are in fact as a commercial landlord

#### Diversification

#### Structure alternatives:

- Owner and Operator
  - higher risk and return
- Landlord (rental stream) lower risk and return

# The case for Case Studies

Learn as an industry: too often Clubs will not admit to a mistake and be open for other Clubs to learn from their experience.

Right for one isn't right for another: just because it worked in one venue in one locale, doesn't mean it can work everywhere.

**Board and Management dynamic**: appreciate the skillsets within the club governance structure

We have taken examples from RSLs across our broad market so that as an industry we can learn and improve

#### **Case Studies**

- Contacted 10 clubs
- Asked 10 questions
- Differing degrees of detail provided
- We have summarised the results for financial and non financial outcomes
- We would like to thank those clubs who gave their time and shared their information

| 1 | 1 Who initiated the diversification strategy? (Board / Management / Both) |               |               |          |           |    |  |  |  |  |  |

|    |  |           |             |        |   |  |

- Type: Widening and Broadening
- Projects: (1) Expand Motel from 42 to 78 rooms, (2) create 2,000 sqm of sophisticated food offering to appeal to traditional non-Club demographics
- Goal: expand the offering to attract a larger customer base, effective usage of land

- Result: revenue contribution of \$3.5m and 45% EBITDA on Hotel. Greenhouse drove membership from 16,000 to 20,000 but layout and design prove problematic due to the climate.
- **Lessons:** research is paramount, 'what if' scenarios on performance. Top end food is a challenge, layout can effect performance.
- Advice: get your core business working before starting, and do your best to ensure it isn't effected once the new business opens. Look for businesses that complement the current offering.

| Profit change     | -80.4% |
| Net asset change  | 33.4%  |
| Membership change | 27.3%  |

- Result: a write down of the Hotel value in 2018 (\$265k). Taxi business closed.
- Lessons: needed to have a better understanding of the labour required to run the Taxi business(Uber not a factor). Motel business will continue, drought has been a major factor in the overall economy in the area.
- Advice: understand the skillsets needed and the cash flow effect on the business. Membership engagement is very important.

- Type: Widening and Adjacency
- Projects: (1) acquire local taxi business, (2) acquire a nearby Motel
- Goal: diversification and serve the core business of the Club

- Dubbo RSL the Motel and Gym businesses have complemented the Club and Gaming now accounts for less than 60% of revenue
  - Gus Lico (GM) identify projects the community will support and appeal to visitor traffic

DUBBO RSL

- Norths have broadened their market with higher end food offerings in higher income areas. Gaming as a share of revenue has declined from 74% (2013) to 52% (2018)
  - Luke Simmons (CEO) look externally for skillsets that will make the business work

- **Griffith Exies** have widened their market with a 52 room Motel acquisition in 2014 that has been a positive contributor. Gaming revenue contribution has gone from 72% (2013) to 60% (2018). Profitability is up 50% in the period
  - Garry Tucker (CEO) the most important trap to avoid is overload, ensure you have sufficient resources

- Penrith RSL have broadened and widened their offering with an outsourced 'Monkey Mania' kids area, outsourced food. Profit has risen 54% from 2013 to 2018
  - Neel Chand (CEO) invest in infrastructure, work with the Board and engage the community.

## Outcomes generally

Highest degree of diversification achieved in RSL survey was Dee Why RSL. Reduced the degree of reliance on gaming by 2%

Best degree of diversification in "clubland" is 34% of revenue diversified, and 30% of EBITDA.

Investment \$180 million.

Clubs can't survive long term in current form without gaming or a similarly profitable revenue stream, and there is no identified substitute for gaming in typical club business model

#### Take a look at numbers

- revenue mix example.xlsx
- We will play with these numbers in the workshop

|                        |     | Gan | ning       |     | Be | verage    |     | F  | ood       |             | Rer | nt         |       | Total Revenue |

# Take time to Question

- Why consider diversification?
- What are hotels doing?
- Should we be concentrating on what people in the gaming market want, and why they are preferring hotels over clubs?
- Perhaps we should be focused diversifying our active customer and member base rather than our business activities?

#### Diversification Outcomes in Clubs

Prior to hotels being entitled to have gaming machines they generally struggled for profitability

The best examples of diversification in clubs, still see a reliance on gaming of 65 % of profits.

No business can remain viable in its current form if 65% of its profit is eliminated.

Reliance is reduced but dependency is not eliminated.

#### **Diversification Drivers**

#### Correctly identify drivers for diversification

- Risk management
- Gaming reliance
- Improved use of capital
- Responding to changing needs of community

#### When is the correct time?

When there is a viable core business

Is there an overarching masterplan and strategy?

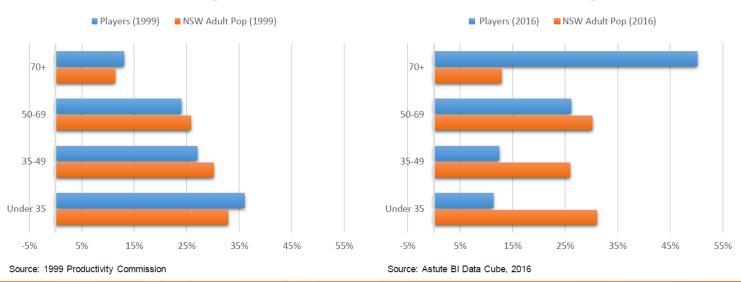

#### Beware of impact of accounting

# Gaming Trends

#### **Changing Player Demographics**

#### 1999 – Club Player Profile

#### 2016 - Club Player Profile

2016 CLUBSNSW CONFERENCE & AGM

# The Club and Pub Gamer Conveyor

# Diversification is not short term

Diversification as a short term saviour is a risky strategy which is rarely successful

Your cash flow must support independent advice in planning stages

Your core business must be able to support diversification

Diversify your gaming customers and diversify your business activity.

Clubs had a diverse customer base and lost it.

#### Conclusion

Diversification requires significant capital investment if it is to have any material impact on gaming reliance

Need to diversify your member and customer base

Diversify your business to diversify your customer base, it will reduce reliance on gaming but cannot eliminate it.
